

Dvara Solutions is an ISO 9001:2008 certified technology-product company whose mission is “to be a catalyst to high quality originators who aspire to maximize financial well-being of their customers”.

Dvara Solutions’ technology, financial product solutions and deep expertise in professional services such as training and implementation has helped transform a host of organisations in the financial services sectors.

Through their state of the art technology platform - Perdix, Dvara Solutions aims to enable financial institutions to provide convenient, flexible, reliable and continuous financial services to their customers.

Perdix is a fully integrated system that covers lead management, origination, servicing, collections and loan monitoring with salient features such as flexible process framework, automated credit decisioning module, real-time data visualisation and statistical modelling for predictions and forecasting.

Perdix also offers multi-product functionality to support different types of loans, insurance, deposits and payments. The full system can run on mobile devices seamlessly in addition to desktops making the product completely device agnostic. This provides a competitive edge to the financial institution making it truly customer centric.

Perdix also offers multi-lingual capability and the entire system can be made available in a wide-range of regional languages, making usage of Perdix simple and intuitive for the users.

So far, Dvara has implemented Perdix in 9 financial institutions across MFI, SME, Vehicle and Wholesale lending sectors. Perdix has helped these institutions achieve efficiencies, decrease TAT, optimise costs and increase their business volumes to a great extent.
